

..... **Geoscience BC** works in partnership with industry, academia, government, First Nations, and communities in the collection, interpretation and marketing of applied geoscience data and expertise in support of exploration in BC.

We are a not-for-profit society and are governed by a volunteer Board of Directors. Volunteer advisory committees and working groups provide technical direction to the organization.

Geoscience BC was created in April 2005 with a \$25 million investment from the Province of British Columbia. Subsequently, almost \$24 million in additional investment has been received for mineral and oil & gas projects.

..... **Geoscience BC** is an applied geoscience organization, with a mandate to encourage mineral and oil & gas exploration and development investment in British Columbia through the collection, interpretation and marketing of publicly available geoscience.

Our goal is to enhance the prosperity of BC and its communities through increased exploration and development of its mineral and oil and gas resources.

Unlocking BC's Potential With Geoscience

Initiatives

Geoscience BC supports many different types of initiatives, including:

- Airborne and ground geophysical surveys
- Regional and targeted geochemical programs
- Bedrock and surficial mapping
- Mineral deposit studies
- Surface water and groundwater studies
- Workshops
- Technical Presentations

Many projects have matching funding from industry, universities, government and/or communities, and are undertaken by consultants, contractors and geoscience researchers (including students).

The results of all Geoscience BC projects are released in a timely fashion through Geoscience BC's website.

The map on the right shows just some of Geoscience BC's recent projects. For more information on our current project and outreach activities, please contact us or visit our website.
