

Mining – What's It All About?

October 27 & 28, 2012

What:

- A free, interactive two-day workshop that gives First Nation Communities a look into modern geoscience, mineral exploration and mining.
- The course will be presented by Dr. Jim Morin, an engaging BCIT instructor and member of the Metis community.
- The first day is spent in the classroom; the second day is a field trip to local geological sites.
- Complimentary snacks and lunches will be provided on both days.

Why:

First Nations input about projects on their traditional land is critical for the well-being of their communities.

Where:

North Island College, Port Hardy

When:

October 27 and 28, 2012
8:30am - 4:30pm

Who:

Everyone is welcome! First Nations community leaders, councillors, Elders, personnel involved in land use and planning, community relations, and economic development officers should consider attending.

Pre-registration is required and spots are sure to fill quickly. Registration deadline is **October 19, 2012**.
